

# Posi-Tap (small) Usage & Packs

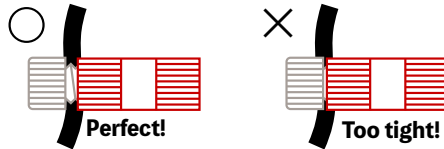

We recommend the NS-series for connecting to thin vehicle CAN wires.  
Be sure to confirm the size of your CAN wires before purchasing.

## How to Use

- 1 Remove both caps. Posi-Tap Conn. Slot in GRY cap
- 2 Put the vehicle wire into Gray cap's slot and gently screw needle-side into cap. 0.4~0.5mm 24~26AWG
- 3 Feed the security system's wire through the red cap. 10mm
- 4 Insert cap into body with bare wire protruding. Screw tight. Insert cap into body with bare wire protruding. Screw tight.

NOTE! Screw the body enough so it won't come off over time, but not so much you completely smash the wire
